Import your Payment Files in Commercial Banking Online

In Commercial Banking Online all **Payment Files** must be imported using an **Import Map**. There are two different **Import Maps** available to import **Faster Payments**:

- Corporate Online Import Map.
- Commercial Banking Online Import Map.

Follow the instructions in this guide to prepare your **Import File** for use with one of the **Import Maps**.

Important Information

We recommend that you use the Corporate Online Import Map, as by choosing this option you may not need to make any changes to your local systems.

Using the Corporate Online Import Map

This **Import Map** allows you to continue to use your **Import File** in the same format as you used for Corporate Online, subject to making a few checks and changes to your local payment software, if required.

To use this **Import Map** you will need to make the following changes to your local payment software:

Length of field entries is within CBO limit	If the length of the entry in a field exceeds the maximum length for that field the payment will be rejected. You will need to amend your local file format to match the specifications for Commercial Banking Online.
Only contains a single debit account	The Corporate Online import map can only process payments from one debit account per import file. To import payments from multiple debit accounts in a single import file please split down into an individual file for each debit account or use the Commercial Banking Online Import Map.
Only contains a single value date	The Corporate Online import map can only process payments from one value date per import file. To import payments from multiple value dates in a single import file please split down into an individual file for each value date or use the Commercial Banking Online Import Map.

To support you in making any changes required, sample **Import Files** and specifications are available for download from the Move to Commercial Banking Online Support Site.

Once you've checked your file, use the bespoke Corporate Online **Import Map** to import it into Commercial Banking Online. Find it by following the steps below:

 **To do**

Homepage → **Manage Payments** → **Importing** → **Import Payments**

In the 'Format Section' select the option below:
Map Name: 'XCOLFPSCSV'
Description: 'Import Map for Corporate Online Faster Payment CSV imports'

[Step-by-step instructions for importing payment files](#) are available in the Commercial Banking Online Support Centre.

We recommend that you test your **Import File** while in the **Dual Access** period ahead of your move to Commercial Banking Online. Instructions for testing **Import File** and resolving errors are available from the Move to Commercial Banking Online Support Site.

 **Important Information**

Testing your **Import File** will help you to spot and fix any errors before using it for the first time in Commercial Banking Online.

Using the Commercial Banking Online Import Map

This **Import Map** is compatible with the standard file format for Commercial Banking Online. It will not work with the Corporate Online standard import format.

To use this **Import Map** you will need to configure your local payment software to produce the **Import File** in the Commercial Banking Online standard format, making the below changes:

Update the Header & Trailer record	The Header line contains 3 fields (field position 1 to 3) and need to be populated as follows: <ul style="list-style-type: none">Header Indicator: HImport date: YYYYMMDDUnique Sequence Number: Every payment file submitted by a user must have a unique number to help prevent duplicate imports. The Trailer line contains 1 field (field position 1 in file) and needs to be populated as follows: <ul style="list-style-type: none">Trailer Indicator: T
Update the file structure to match the Commercial Banking Online template provided	Ensure the order of fields matches the file specification for Commercial Banking Online. You'll find this on the Move to Commercial Banking Online Support Site.
Update the format of fields into valid format for Commercial Banking Online	Debit Account Number: must be combined into one field, including a hyphen to format the sort code and account number as SSSSSS-AAAAAAA. Value Date: must be in format YYYYMMDD
Check the length of field entries is within Commercial Banking Online limit	If the length of the entry in a field exceeds the maximum length for that field the payment will be rejected. You will need to amend your local file format to match the specifications for Commercial Banking Online.

To support you in making any changes required, sample **Import Files** and specifications are available for download from the Move to Commercial Banking Online Support Site.

Once you've checked your file, use the bespoke Commercial Banking Online **Import Map** to import it into Commercial Banking Online. Find it by following the steps below:

✓ To do

Homepage → Manage Payments → Importing → Import Payments

In the 'Format Section' select the option below:
Map Name: 'Faster Payment'
Description: 'Faster Payment CSV'
